***Information Disclosure Statement***

The information disclosure statement (IDS) submitted on August 27, 2003 was considered by the examiner.

***Response to Arguments***

Applicant's arguments with respect to claims 1-3 have been considered but are moot in view of the new ground(s) of rejection.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Masnaghetti et al.

Masnaghetti et al. teaches a scanning electron microscope and method of use comprising :

An electron source (202), an acceleration means with a voltage supply (206), a scanning deflector (220), an objective lens for focusing the electron beam (219), a holder on which the sample is disposed (Col. 12 Lines 19-30) to be supplied with a bias voltage, a controller (250) for controlling the electron beam by forming an electric field between the sample and object lens (Note Field Lines in Fig. 2A between Item 219 and 220 and 222) such that the surface of the sample is charged (Fig. 6D) and adjusting the irradiation of the surface of the sample by controlling the sample charge such that

Art Unit: 2881

secondary electron generation efficiency approaches 1.0 (Fig. 5 and Col. 8) as recited in claims 1 and 3.

Claim 2 requires that a positive or negative potential be applied to an electrode at the object lens to promote sample charging. Lower octupole 220 is at the objective lens and comprises a plurality of electrodes and also has applied thereto a positive or negative potential to promote charging to the sample by directing the beam on the sample surface (Col. 12 Lines 10-20).

### ***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
